

Journey -to- Impact

ANNUAL REPORT 2017-2018

arbi making life better
Association for the Rehabilitation of the Brain Injured

The brain and nervous system are governed by one fundamental unit: neurons. They are the connection that helps with the function of the brain, which is essential for recovery.

Neurons are not unlike ARBI itself - the interaction of clients, staff, volunteers, community partners and donors creates a truly powerful synergy. It is this synergy that is the foundation of hope and transformation for our clients and their families.

What role will you play in this synergy?
